● About the Dataset

In Dec 2025,

Hactivist Martha Root deleted White Supremacists Dating websites like WhiteDate, WhiteChild during a live conference.

These websites all aimed at providing platforms for White Supremacists and Anti-Semites

The Hacker

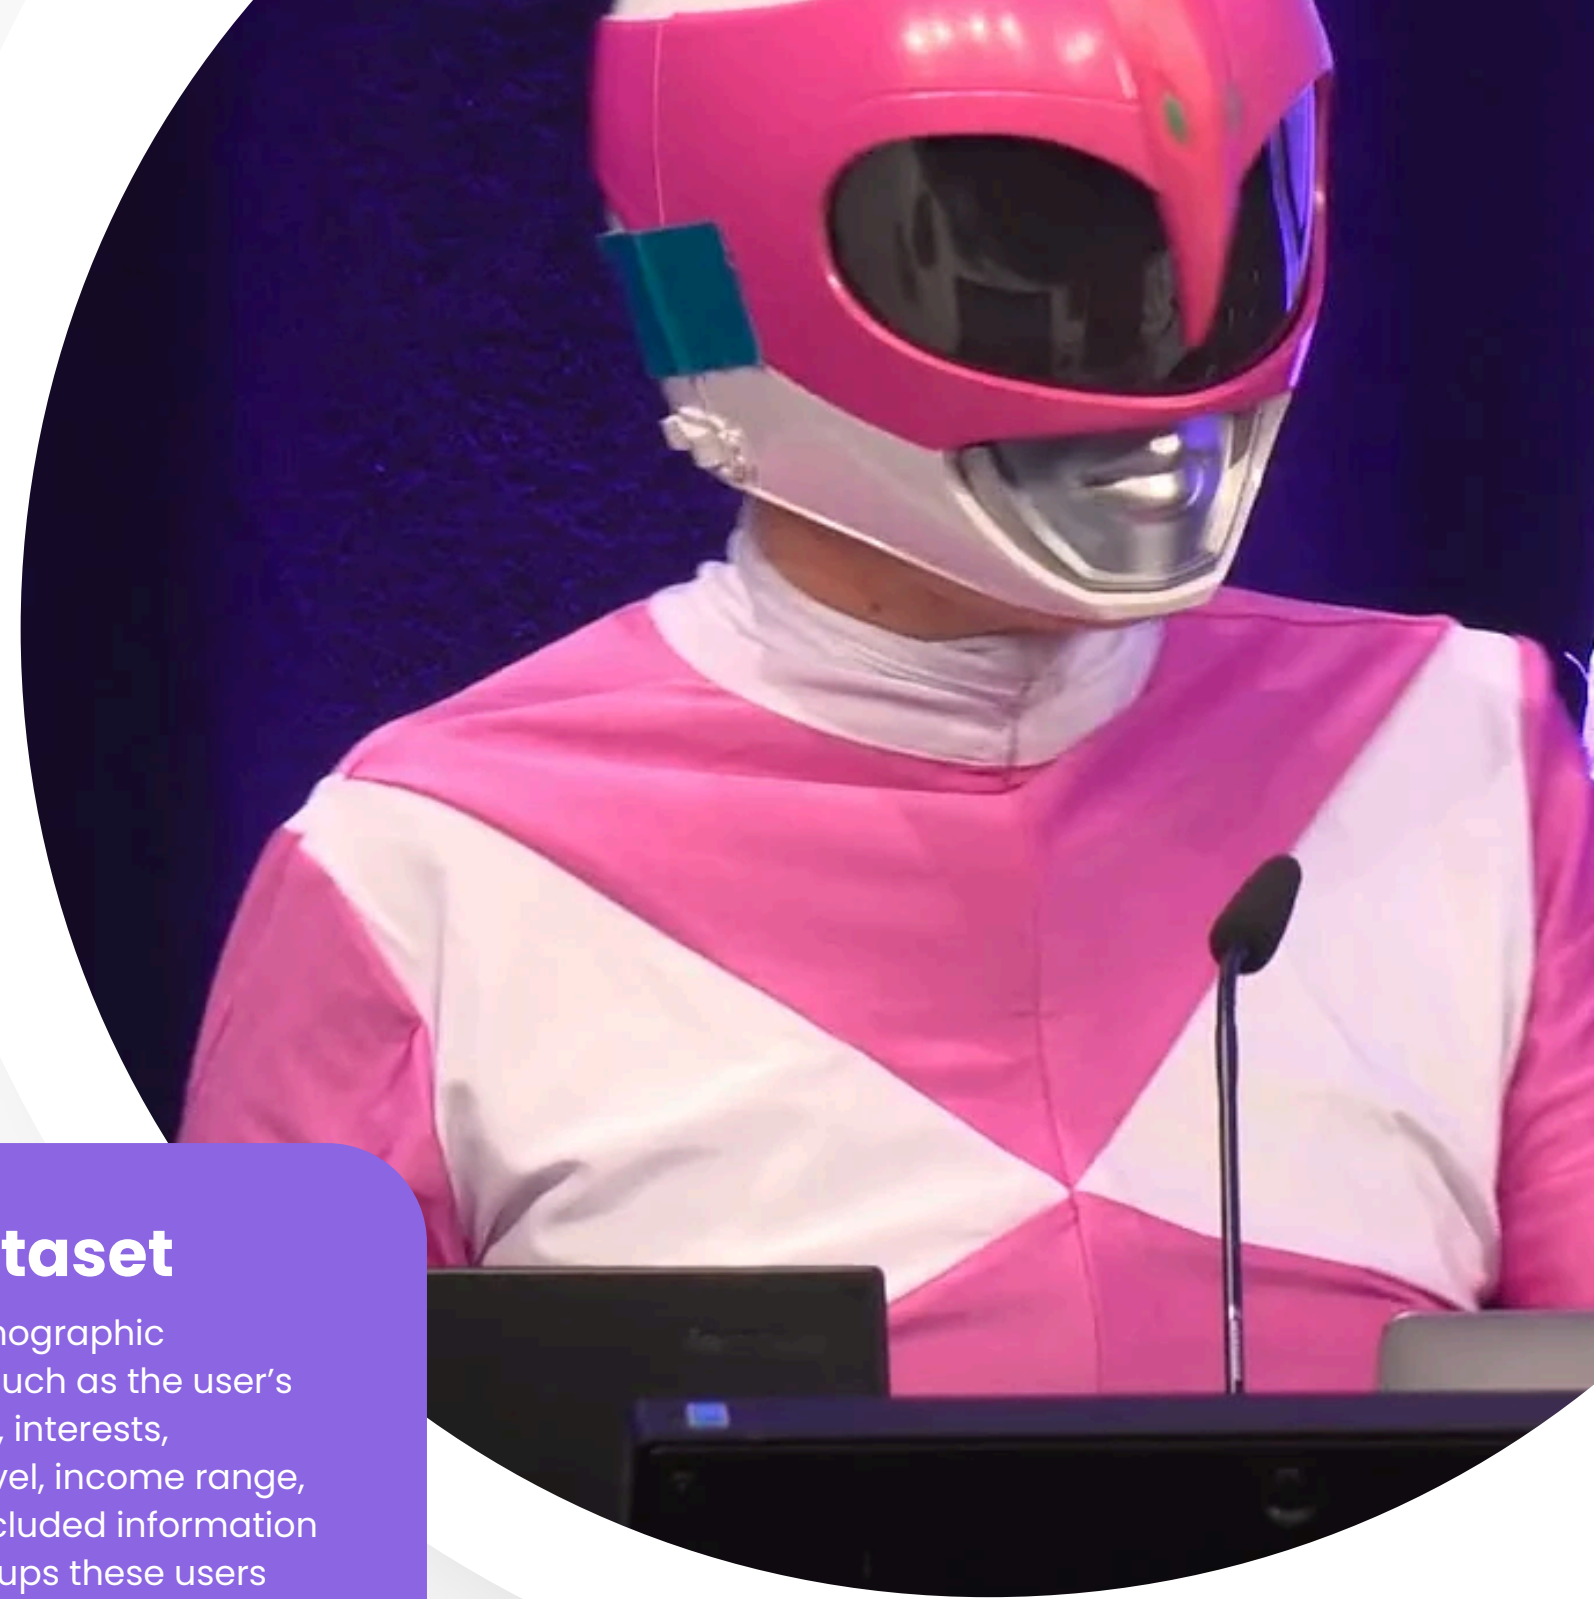

Also made the user data public for researchers to analyze and extract information from.

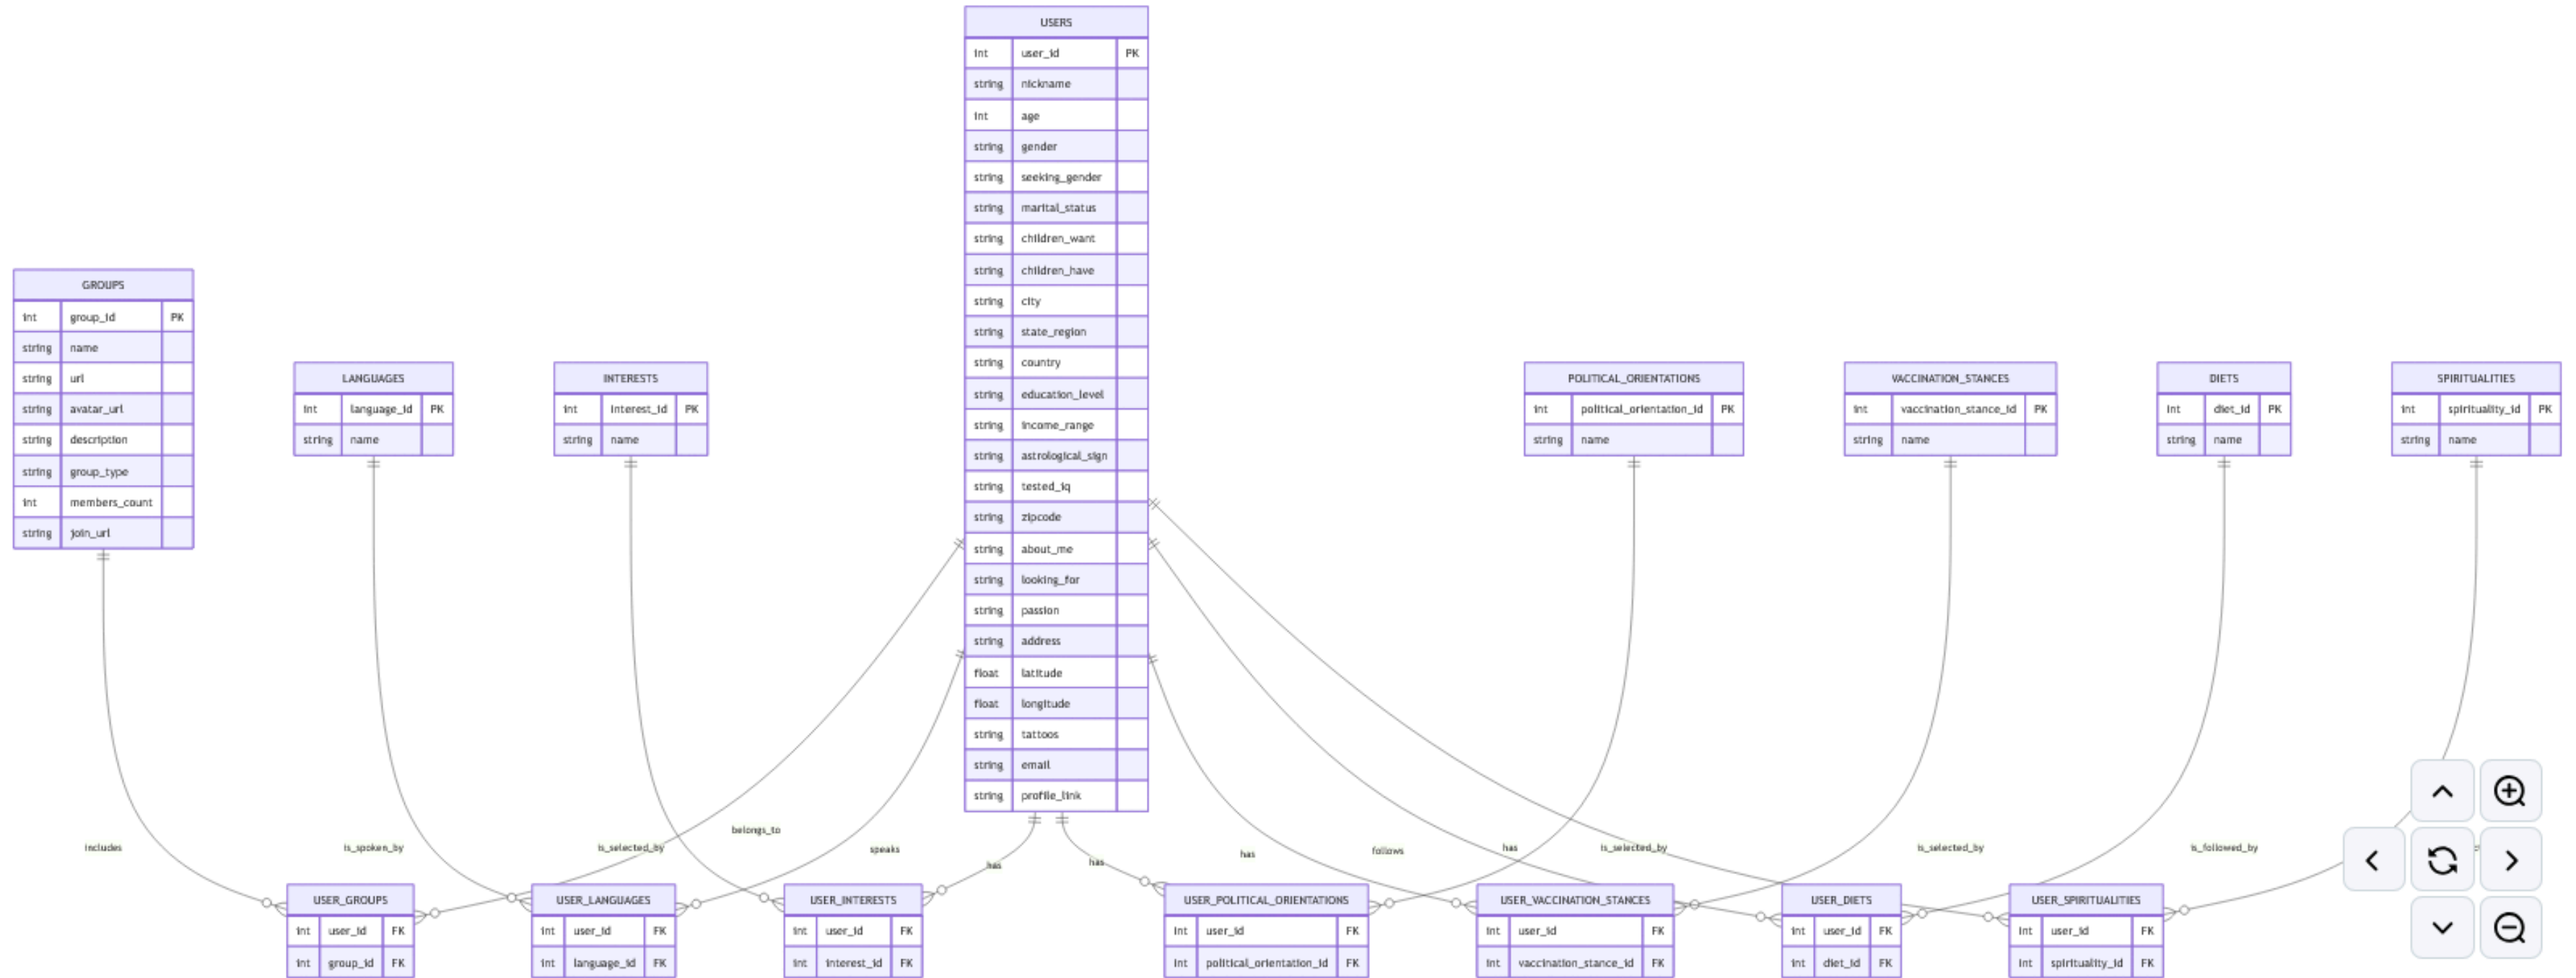

Our dataset is made up of data about 6500 of such users of the WhiteDate website.

The Dataset

Includes demographic information such as the user's location, age, interests, education level, income range, etc. It also included information on which groups these users were a part of.

Database Schema

MongoDB Transformation

RELATIONAL MODEL

- PostgreSQL database
- Normalized schema
- Multiple tables
- Bridge tables

TRANSFORMATION

- Python + PyMongo
- JSON processing
- Data cleaning
- Embedded documents

NOSQL MODEL

- User-centered documents
- Denormalized structure
- Embedded arrays
- Reduced joins

MongoDB

AGGREGATION QUERIES

- \$group
- \$unwind
- \$match
- \$project
- \$sort

```
db.users.aggregate([
  { $unwind: "$political_orientations" },
  {
    $group: {
      _id: "$political_orientations",
      avg_age: { $avg: "$age" }
    }
  },
  { $project: { _id: 0, political_orientations: "$_id", avg_age: { $floor: "$avg_age" } } }
])
```

INDEXES

- user_id
- country
- interests
- groups.name

Name & Definition	Type	Size	Usage	Properties	Status
> _id_	REGULAR	127.0 kB	0 (since Thu May 28 2026)	UNIQUE	READY
> user_id_1	REGULAR	143.4 kB	0 (since Thu May 28 2026)	UNIQUE	READY
> country_1	REGULAR	94.2 kB	0 (since Thu May 28 2026)		READY
> interests_1	REGULAR	180.2 kB	0 (since Thu May 28 2026)		READY
> groups.name_1	REGULAR	139.3 kB	0 (since Thu May 28 2026)		READY

EXAMPLE QUERIES

- Most common interests
- Top groups
- Users without groups
- Political orientation by country
- Vaccination stance by country
