About the Dataset

In Dec 2025,

Hacktivist Martha Root deleted White Supremacists Dating websites like WhiteDate, WhiteChild during a live conference.

These websites all aimed at providing platforms for White Supremacists and Anti-Semites

The Hacker

Also made the user data public for researchers to analyze and extract information from.

Our dataset is made up of data about 6500 of such users of the WhiteDate website.

The Dataset

Includes demographic information such as the user's location, age, interests, education level, income range, etc. It also included information on which groups these users were a part of.
